TECHNICAL PROJECTS

SKY BEAR BREWERY

Front end || Back end || demo

A visual playground, this brewery web app has a functioning sign-up/login page using JWT authentication with direct clickable links to different pages using React Router.
- Engineered with React and React Router for the frontend and Ruby on Rails for the backend
- Utilized bootstrap for various design elements and JWT for authentication
- Optimized for responsive design on any device

MY THREE. JS UNIVERSE

Visit Here || GitHub

An amusing and interactive way to get a glimpse into my life, this 3D universe was challenging and entertaining to make!!
- Constructed in THREE.js
- Interactive photo journal

SNACK PAK RECORDS

Front End || Back End || Demo

Mock landing page for an EDM-style record label featuring SoundCloud playability and an interactive way to showcase artists and releases.
- Created using React and Bootstrap for the frontend and Ruby on Rails for the backend
- Built to respond to any device size

GYM APP

Gym App Repo || Demo

Workout routine building app with numerous exercises featuring the capability to track, add, and dismiss workout routines once completed.
- Developed with React, JavaScript, JSON, HTML, and CSS
- Formulated to simplify workout routines
